

Lotus Eldercare Collaborates with Procure Manpower to Provide Specialized Caregivers for Older Adults in Singapore

In a significant step towards enhancing the quality of eldercare in Singapore, Lotus Eldercare Ptd Ltd has joined forces with Procure Manpower to offer highly trained caregivers for older persons dependent on their basic activities of daily living (ADLs). This collaboration underscores the commitment of both organizations to address the growing need for specialized eldercare in an aging population.

Training Program and Certification

The caregivers provided through this partnership undergo a rigorous training program lasting a minimum of three months. This training is conducted by Singapore-certified state-registered nurses in Yangon, Myanmar. The comprehensive program ensures that caregivers are well-equipped with the necessary skills and knowledge to provide high-quality care.

Holistic Care Approach

The training program focuses on three key areas:

1. **Physical Care Aspects:** Caregivers are trained to assist with essential daily activities such as bathing, dressing, feeding, and mobility. They learn techniques to ensure the physical well-being and comfort of the elderly, including proper body mechanics to prevent injuries.
2. **Monitoring Aspects:** Caregivers are taught to monitor the health and vital signs of older adults. This includes tracking changes in their physical and mental health, administering medication, and recognizing early signs of potential health issues.
3. **Ageing in Place:** A significant component of the training is understanding the concept of ageing in place. Caregivers are educated on the importance of enabling older adults to live independently in their own homes for as long as possible. They are trained

to create a supportive environment that fosters autonomy and respects the preferences of the elderly.

Impact on Eldercare in Singapore

This collaboration is expected to have a profound impact on the eldercare landscape in Singapore. By providing specialized caregivers who are thoroughly trained and certified, Lotus Eldercare and Procure Manpower are addressing the critical need for high-quality care services. This initiative not only enhances the quality of life for older adults but also provides peace of mind for their families.

Testimonials and Feedback

Early feedback from families and elderly clients has been overwhelmingly positive. Care recipients have reported improved physical and emotional well-being, attributing this to the compassionate and skilled care provided by the trained caregivers. Families have expressed their gratitude for the reliability and professionalism of the caregivers, which has significantly eased their caregiving burden.

Looking Forward

Lotus Eldercare and Procure Manpower are committed to continuous improvement and innovation in eldercare services. They plan to expand their training programs and introduce more specialized modules to address specific needs such as dementia care, palliative care, and chronic disease management.

In conclusion, the collaboration between Lotus Eldercare and Procure Manpower marks a significant advancement in the provision of eldercare services in Singapore. Through rigorous training and a holistic care approach, they are setting a new standard for the care of older adults, ensuring that they receive the respect, dignity, and quality of life they deserve.
